Ecofreen Co., Ltd. based in Korea produce and export Mister-T1 and Pretreat Liquids in more than 50 countries and proud to be a leading solutions provider of DTG Printing with the most diverse range of direct textile pretreatment equipments. With innovative and creative solutions designed to meet the needs of customers, Ecofreen's Automatic Pretreatment Spray Machine delivers the industries most advanced, precise and reliable quality standards. Ecofreen assure you of the most ideal and practical solution with consistent, reliable and hassel free maintenance.

Mister-T1

AUTOMATIC PRETREAT SPRAY MACHINE

“ Compliments from around the world ”

“ I appreciate that you create one of the best PT machines of the market, I saw in international fairs a lot of machines but are expensive, fragile and they did not look so complete like Mister-T1.” (USA)

“ The customer using the Mister-T1 is one of our high end users.
He Prefers the Mister-T1 over any other pre-treat machine, he loves it. ” (Australia)

“ The fine mist it sprays is consistent - compared to other machines where the spray can be uneven. It is much easier to clean than the other pre-treat machines.
The light inside sets it apart and above the others. The size of the pump is the best part - all others have a small pump which is inconsistent. ” (Australia)

MAIN FEATURES

- Fully Electric Version (No Air Compressure Required)
- Rust Free Structures and Parts (All Aluminum and Stainless Steel Structures)
- Hassel Free Anti Nozzle Drying or Clogging System with Capping Station
- Smart Auto Nozzle Cleaning and Flushing Program
